

CLIENT RELATIONS

We believe the relationship between client and consultant is a collaborative partnership working in tandem to identify the gaps preventing an organization from achieving their goals and then together implementing a viable solution.

At Tilak Learning Group we create visually appealing, interactive elearning courses that are results driven.

We offer full elearning course design and development with courses authored in Adobe Captivate, Articulate Studio and Storyline, and Camtasia Studio.

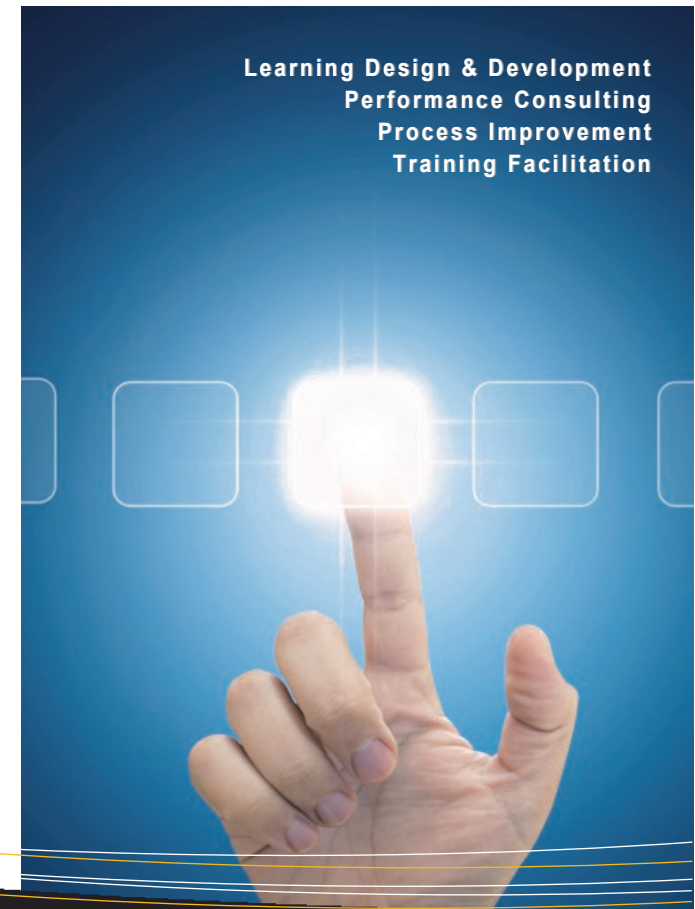

We offer a strong understanding of learning theory and instructional design techniques including all points of the ADDIE process – needs analysis, design and storyboard, development with review cycles, implementation, and evaluation.

Learning solutions that work for your business

HELPING CLIENTS MEASURABLY IMPROVE PERFORMANCE

To implement a viable solution, we look at not only what type of training may be needed to solve the issue, but if training is needed at all. Our goal is to create learning experiences where participants immediately use the new knowledge and skills back on the job.

TOOL KNOWLEDGE

- ARTICULATE STORYLINE
- ARTICULATE STUDIO
- ADOBE CAPTIVATE
- CAMTASIA
- ICLONE
- MS OFFICE

flexible solutions for your business needs

PERFORMANCE CONSULTING

As Performance Consultants, we take pride in working with each client to attain the most effective and efficient solutions that lead to positive outcomes for the organization or individual. We work with your organization to design innovative learning strategies, then develop those strategies into customized deliverables. Our work is a reflection of the relationships we build with clients.

DESIGN & DEVELOPMENT

As experienced Instructional Designers and Developers, we strive to fully understand the outcomes in knowledge, behavior or attitude that must be attained to effect change. We apply various instructional learning strategies that provide maximum learning. Adult learning is most effective when presented in a relevant context so the skills, strategy, and knowledge are meaningful to participants and can be applied directly in the training and as soon as possible back on the job.

THE FIVE-D APPROACH

Discuss, Determine, Design, Develop and Deliver. We have an Instructional Designer and PMI Certified Project Manager who work with you to determine a solution to meet your strategic goals.

PROCESS IMPROVEMENT

With a project manager who is a certified six sigma black belt on staff, we can assist in mapping the "As Is" and "To Be" to streamline processes ensuring your ROI.

TRAINING FACILITATION

Whether online or in the classroom, we have the experience to assist your training needs.
